

Liang Wei

Senior DevOps / Platform Engineer | Singapore | liang.wei@techmail.sg | +65 9123 4567

github.com/liangwei | linkedin.com/in/liangwei

PROFILE

DevOps engineer with 7 years building resilient CI/CD pipelines and cloud infrastructure at scale. Deep expertise in Kubernetes, Terraform, and observability stacks. Reduced deployment failures by 70% at two successive employers.

CORE COMPETENCIES

Containers: Docker, Kubernetes (EKS, GKE, AKS), Helm, Istio

IaC: Terraform, Ansible, Pulumi, CloudFormation

CI/CD: GitHub Actions, Jenkins, ArgoCD, Tekton, GitLab CI

Cloud: AWS (Advanced), GCP, Azure

Observability: Prometheus, Grafana, ELK Stack, Datadog, OpenTelemetry

Languages: Bash, Python, Go (basic)

PROFESSIONAL EXPERIENCE

Senior Platform Engineer | Sea Group (Shopee), Singapore

Apr 2020 – Present

- Managed Kubernetes clusters across 6 AWS regions handling 500K+ daily deployments
- Implemented GitOps with ArgoCD, reducing release cycle from 2 weeks to 1 day
- Built self-service infrastructure portal reducing developer wait time by 80%
- Achieved 99.99% SLA for core payment services through chaos engineering

DevOps Engineer | Grab, Singapore

Aug 2017 – Mar 2020

- Built multi-cloud Terraform modules used by 30+ engineering teams
- Reduced AWS monthly spend by SGD 180K through rightsizing and reserved instances
- Led on-call runbook initiative; decreased MTTR from 45 min to 12 min

EDUCATION

B.Eng Computer Engineering | Nanyang Technological University, Singapore | 2013–2017

CERTIFICATIONS

- CKA – Certified Kubernetes Administrator (2023)
- AWS Solutions Architect – Professional (2022)
- HashiCorp Terraform Associate (2021)
